

ZOUBAA MOHAMMED

BACKEND ENGINEER

Fès, Maroc • +212 701230904 • github.com/zoubaax • linkedin.com/in/zoubaa-mohammed • zoubaa.dev

PROFIL PROFESSIONNEL

Highly motivated backend engineer with experience in designing and implementing scalable financial systems, proficient in backend languages and frameworks, and skilled in security and compliance integrations. Strong understanding of clean architecture, layered abstractions, and complexity tradeoffs. Proficient in operating independently and executing in fast-moving environments.

EXPÉRIENCES PROFESSIONNELLES & STAGES

Full-Stack Developer (Stage) | Le Centre d'E-Learning, de Simulation et de Télémédecine 2024-09 – 2024-10

- Architecture: Designed UML diagrams and implemented RESTful API for course management.
- Development: Implemented interactive features with responsive UI components using React.js and Express.js.
- DevOps: Collaborated in Agile mode with sprints and stand-ups, utilizing Postman for API testing.

Full-Stack Developer (Stage) | NewDev Maroc 2025-02 – 2025-04

- Architecture: Conceived a 4-role user system via a secured RESTful API.
- Development: Implemented online appointment scheduling and real-time patient tracking.
- DevOps: Deployed CI/CD pipelines using Docker for continuous deployment and maintenance.

Automation & Test Engineer | Neologix 2026-07 – 2026-09

- Test Automation: Engineered automated E2E test suites using Playwright, Pytest, and Cypress.
- Performance Testing: Conducted load and stress testing with JMeter and Locust, achieving 30% improvement in peak API response times.
- CI/CD: Integrated automated tests into GitHub Actions pipelines, reducing regression bugs by 45%.

PROJETS RÉALISÉS & PRODUCTS

Smart University : ERP Universitaire & Intelligence Artificielle (RAG)

Stack: React, Node.js, Express, Neon, Gemini AI, Tailwind CSS, Vercel, Git

- Pipeline IA: Implemented RAG pipeline for generating employment schedules and PDF to quiz synthesis.
- Architecture: Designed a secured RESTful API with RBAC middleware and atomic design for UI.
- DevOps: Deployed automated CI/CD on Vercel with GitHub Actions and managed persistence on PostgreSQL (Neon).

Maliki AI : Assistant de Recherche Fiqhi (RAG & NLP)

Stack: Python, FastAPI, React, PostgreSQL (pgvector), Docker, Gemini AI, Hugging Face, Git

- Pipeline IA: Implemented NLP pipeline for Arabic text processing and semantic search via vector embeddings.
- Architecture: Built a RESTful backend API with FastAPI and secured it with RBAC.
- DevOps: Deployed the backend on Hugging Face and the frontend on Vercel.

TaskMaster : Dashboard de gestion de tâches (Full-Stack)

Stack: Java, Spring Boot 3.4, JPA/Hibernate, API REST, Spring Security, React, PostgreSQL

- Architecture: Designed an N-Tier architecture with Spring Boot and secured it with JWT/RBAC.
- Development: Implemented task management features with reactive state management and responsive UI components.

FORMATIONS & DIPLÔMES

Cycle d'Ingénieur en Informatique (Génie Informatique) — Université Privée De Fès 2025-09 – en cours

Technicien spécialisé en développement informatique — École Privée des Techniques Économiques et Commerciales 2023-09 – 2025-07

Baccalauréat scientifique - option Sciences Physiques — Etablissement Masar El Hikma 2021-09 – 2022-07

COMPÉTENCES TECHNIQUES

JavaScript, TypeScript, Java, Python, React, Node.js, Express.js, FastAPI, Spring Boot, PostgreSQL, MySQL, Docker, GitHub Actions (CI/CD)

CERTIFICATIONS

- Datacamp - AI Engineer For Developers Associate (Datacamp)
- Datacamp - AWS Concepts (Datacamp)
- Datacamp - Object-Oriented Programming in Java (Datacamp)
